Investment performance

The compound average effective rate of net investment returns (also known as net fund earnings), ending 31 December 2015. Your account is invested in the following options:

Investment option	Date of commencement	6 months	1 year	3 years p.a.	5 years p.a.	10 years p.a.	Since inception p.a.
Balanced (Default) ¹	01 March 88	1.51%	7.00%	11.07%	9.07%	6.38%	8.16%

Please note that the investment returns shown above are provided for comparison purposes only. Weekly net investment returns rates are used for calculating the actual earnings on your investment.

A full list of weekly net investment returns (also known as net fund earnings) for our investment options is available at hostplus.com.au

The long-term investment returns are not necessarily reflective of your actual return over the same period. This could be due to you moving into or out of the investment option at a time during the periods, or due to the splitting of your superannuation across more than one investment option.

For further details on how returns are calculated please refer to the "Net Investment returns" section of the Statement Guide. Net investment returns are allocated to your account:

- at 30 June and 31 December each year,
- when you switch between investment options, or
- when you fully withdraw (exit) or fully transfer out of Hostplus

Past investment performance is not a reliable indicator of future performance.

¹ From 1 July 2013, the Balanced option, our default option became our MySuper product. The product dashboard for our MySuper option can be found at hostplus.com.au/dashboard
